Introduction to the Fellowship of Spiritual Science

Doctrine and ethics of a Seeker is a guide to the rituals, ethics and wisdom for anyone who wish to learn the way of the Seeker. This book shall provide you the reader with the beginners path into our Spiritual Sovereignty of Spiritual Science and much more.

Any unanswered questions pertaining to our way of life can be answered here. Including references to other text that will provide other compelling knowledge that will support our divine doctrine.

But first allow me to present you with The:

A. Origins and History of the fellowship of Spiritual Science

- 1) August, 7th, 2016 was the founding day of enlightenment! When Prince Augustus Enoch had a divine dream which would bring forth the Divine teachings of the Fellowship of Spiritual Science.
- 2) With this revelation the Doctrine of Spiritual Science was recorded in the holy "book of the messenger" meant to guide all Seekers of truth into the depth of our Creators light, and truths.
- 3) But this Journey which lead to prince Enochs revelation of truth was a trial of Darkness and light. While facing these trials prince Enoch studied long and hard to understanding the divine words of our prophet Enoch, the witness and our seven noble and honorable heralds of the first age. Prince Enoch discovered on this spiritual trek seven divine secrets to bring about human salvation, and free thinkers.
- 4) But before this great revelation prince Augustus Enoch was introduced to many different forms of the Supreme Conciseness by five Grand masters who possessed higher knowledge and guidance which in turn lead to ^{his} later path of trials of Dark and light.
- 5) Grandmaster young taught Prince Enoch about the origins of Self, Culture and the Fury of the Suffering. He taught Prince Enoch the true ~~own~~ origins of humanity and why this story was kept secret for so many years. But unknowingly grandmaster young also taught hatred and oppressive rage which lead to the end of his lessons with Prince Enoch.

6) Grand master patience, this was the second teacher of Supreme ~~Conciseness~~ Conciseness. ~~who~~ ^{who} taught prince Enoch the teaching of attainment, ~~and~~ to become a master of his self, environment, and mental elevation. But his great teachings also taught independence in a community setting and structure which conflicted with the ancient noble and honorable Confucius "Secret" of constructing a equal, civil and productive community.

7) Grand master PI, was the third teacher of Supreme Conciseness. who taught prince Enoch the true teachings of the Gods, and preach the divine Script of the messenger Zecharia Sitchin, the messenger of the Gods. But master PI followed the ancient Code of Moses and his Commandments which tainted much of the righteous path Grand master PI lead. So The prince moved on to find a more enlighten teacher.

8) Grand master Lee, was the fourth teacher of Supreme Conciseness. who taught Prince Enoch how to translate, understand and define the reality of the world we live in from the distorted imagery viewed by the Seeds of the blind. But what Prince Enoch uncovered was Grand master Lee was utilizing this knowledge to cause more distraction, then construction. Thus prince Enoch left Grand master Lee to his distractive ways for a higher form of enlightenment.

9) Grand master eye, was the fifth teacher of Supreme Conciseness. who taught Prince Enoch about morality, wisdom, and freedom on a level higher then most. Grand master eye taught the prince how to never fall victim to the trends, corruption and followers of the matrix or its minions designed to cause you more chaos then Creativity. But Grand master eye also taught selfishness, greed, and Self wealth.

10) Each grand master was great, wise and concise in there own right, But due to the misguided paths found further in there teachings kept Prince Enoch on the Search for the Supreme truth.

11) While prince Enoch was in Search of the Supreme truth he discovered Seven noble and honorable celestials from our past history that lived in truth and righteousness but also moved the people while walking in the light.

IV

12) As prince Enoch study these divine texts, teachings and wisdom He uncovered Seven divine lessons secretly held in each teaching. These secrets helped construct the Supreme path to Spiritual-Science.

13) The Seven heralds of the first age where men fated to mentally, physically and Spiritually liberate the people with all the Compassion and Courage in there heart from the master of oppression, destruction and Chaos. The Sons and Daughters of Satan.

14) These men forged from the hands of Creation, so to one day wake up to the realitys of our world and seek the Supreme Conscience for the betterment of human Salvation. These men where: noble and honorable

1. Buddha, the herald of inner light
2. Confucius, the herald of wisdom and civic equality
3. Jesus of nazareth, the herald of Sacrifice ~~and virtue~~
4. Rama Krishna, the herald of Compassion and virtue
5. Gandi, the herald of unity and discipline
6. Nostradamus, the herald of fate
7. Clarence IX, the herald of Supreme Science.

15) With the true Knowledge that Enoch, the witness being humanitys first prophet of the Gods visitation and the will of our Creator. And the Supreme teachings of the Seven Original heralds, Prince Enoch discovered the virtuous and dark secrets of our cosmic existence. Also he was able to forge the structure for the doctrine of Spiritual Science he would later name "The noble Halo".

16) The noble halo doctrine consist of the full teachings of Spiritual-Science. Each teaching is represented as Rings of the halo.

- First ring of the halo: Union of Spiritual Science
- Second ring of the halo: Basic Spiritual Science
- Third ring of the halo: Advance Spiritual Science

• Fourth ring of the halo: Divine Spiritual Science

17) After Prince Enoch formed the teachings of Spiritual Sciences Doctrine he constructed the modern Laws of the Scale, Constitution of Light which were a reflection of the vows of Enoch, the Will of our Creator, Creation and Science. He wanted a Spiritual Society under one Civil teaching of Enoch and the herald Confucius to create a religious government.

18) With the foundation of the Fellowship of Spiritual Science formed, two types of Spiritual Scientist were written into the Practice of Spiritual Science,

Orthodox and unorthodox Spiritual Scientist;

• Unorthodox Spiritual Scientist: A unenrolled, Partly enrolled, or follower

of the Fellowship of Spiritual Science. These members are non-clergy or assist in Clergy duties assigned by full members. The unorthodox Spiritual Scientist believe in the trinity of life, eye of adgesseous and the Divine Principles of the Scale.

They must honor and respect the ethics and Code of the Fellowship of Spiritual Science. But are not Subject to the Constitution of Light.

• Orthodox Spiritual Scientist: A member of the Fellowship of Spiritual Science fully enrolled into the Fellowship. With a signed and completed declaration of Spiritual truth to follow the vows of Enoch and any law, authority or policy that falls under the Fellowship of Spiritual Science. Full members can be Citizens, Clergy or Ordain as reverends or ministers.

19) A persons enrollment status as unorthodox or orthodox does not change the bond or unity amongst the Spiritual Scientist Community. It just helps the Clergy to understand ones Standing within the Fellowship. Prince Enoch insured that know matter where one stood in the Fellowship they would receive equal treatment.

20) Soon before Prince Enoch knew it he had a Complete divine doctrine of Spiritual Science. Stemmed from a few fated meetings with Grandmasters, investigation and Study of ancient books of the heralds and a holy Dream-vision that changed his life forevermore.

VI

2) Dream-Vision: Prince Enoch had his divine dream-vision ^{That night} ~~the night~~

He founded the Union of Spiritual Science, and the Fellowship of Spiritual Science. What led up to this dream-vision was a emotional and Spiritual battle he fought within himself between his logical thinking, and his faith and loyalty for his clan and Clansmen.

22) Finally fed up with his eternal battle Prince Enoch got down on his knees after bathing himself clean Submitting himself to the Creators will. And ask the Creator: "Who ever you are God, Allah, Brahma, Alpha and Omega, the Holy one or our Creator, I ask of you one last gift! I need to know what you wish of my spirit, If you give me any sign, any dream, anything! I will be your valient Knight of light till the end of days!! I shall leave this wicked world, and live for righteousness!"

23) That night as he slept prince Enoch had a breath taking dream where he was confronted by a marvelous ~~bright~~ bright light that commanded him to: "Spread the truth and teach his brothers" when he awoke he found the book of Enoch at the base of his ~~bed~~ bed. It was this sign that lead to the writing of this and every Spiritual Science text, and the righteous beginning of this Spiritual Fellowship and government. He has sworn himself to uphold and bring forth truth, true justice, liberty, and divinity!!

24) To this very day prince Augustus Enoch has risen up not as a prophet, not as a messenger, nor the Second Coming of our herald Jesus. He comes to the world as the Phoenix reborn, as the prince of light, He comes to you as the herald of the new age and the welder of the first horn of the coming tribulations! HE IS....

PRINCE ENOCH

25) The Trinity of Genesis: Book One

This is the Spiritual Science history of the Creator, Creation and Science. In the Doctrine and ethics of a Seeker this guide shall consist of the First part, and Chapter of this Spiritual Science historic novel to give our new readers a brief understanding of the noble halo, and the union of Spiritual Science. Thus defining why Prince Enoch created the trinity of life and constructed a doctrine based on the Supreme conciseness of a Seeker of truth.

26) Part one, Chapter one, Creator, Creation and Science

We all ask ourselves the big question. Know matter what you believe it, the question always remain the same. Who, what, when, where and why? Does any of this exist? The very fabric of our human existence, too the planetary orbit the earth makes around our magnetized Sun of molting Rock.

27) Some will tell you "we just exist don't worry about it". Others will say "look a magical man ran off a rainbow and created the universe" and a few will say that "look kid, me and your mother had sex one day and there you were nine months later. Now take this bible and do exactly as it tells you or else."

28) on a more serious note the story of existence is more controversial than the O.J. Trials. For centuries men and women have debated this topic in some of the most well renowned academic circles on earth. And even some of the most uncanny circles like Scientology.

29) But what continues to baffle me as a Seeker of truth is how far from truth everyone really is. What makes things worse is if these communities, societies or circles would stop for a few seconds and think, they would realize that they all hold pieces to the most colossal puzzle in human existence.

30) Who?, What?, When?, where?, and why? First lets begin with Who; you should already know mathematics is absolute!

VIII

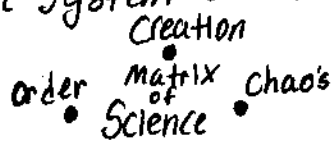

With that established you should clearly understand that the mathematical system of creation and destruction is a never ending cycle of constant changing, and shifting energy.

- 31) With this known who is the creator? what is he/she made of? How did he/she come into existence? And where is he now? Today these puzzling questions can be answered with more clarity and accuracy.
- 32) The creator is our alpha and omega (beginning and end in Greek). Without a creator, over, creator nothing would be or exist in our living universe. We as spiritual ~~beings~~^{scientist} believe in the creator's alpha stage he/she was a mass of vast energy spread out in a unconcise web of ~~energy~~ energetic atoms that cycle in there own spiral of atomic existence.
- 33) As the cycle went on and on, it began to generate wild sparks of magnetic energy that would briefly change the atomic atoms into various forms of atomic energy. Thus bringing into existence the creative force and destructive force of atomic energy. Two forces of similar origins and intensity drew in the atomic energy around it like the magnetic force of the sun till all that there was left was two prime forces of existence! Creator and destroyer. Both forces moving at accelerated rates pulled by one another's magnetic force where on a full on collision for one another.
- 34) The Big Bang; When the force of creative atomic energy slammed into the destructive atomic energy, another force was caused into existence, Chaos! Like raging cosmic fire these two forces forged into one entity of cosmic conciseness. The creator; The very aftermath of the creator's ascension to conciseness caused the atomic mutation which brought about new elements known as star dust.
- 35) At the center of the ~~universe~~ universe our creator began to explore this new existence and expand the very fabric of our universe. But first he would need to create, Light!

IX

36) Creation: Being the prime source of magnetic energy the Creator unleashed forces of similar magnetic nature as it self into the dark universe, lacking one main trait. Self Consciousness. Thus the "Suns" of the universe were created to bring forth life and equally destroy it. And to also give the Creator his/her own version of light, sight and observation of the vast triple black shell of the universe.

37) The Creator examined the aimless elements of the universe thus choosing to give all things purpose. But to accomplish such a task he/she would have to create a trust worthy system that commanded itself objectively without favor to ~~none~~ and ~~servant~~ to anyones will but the creators. So he/she weaved a metric system of 4 sources of prime cause(s) and effect.

•
Distraction

38) Matrix of Science: The matrix of science was pushed into motion by the creators magnetic pulse (The KI or chain of KI). Also known amongst the scientific communities as gravitation. This source of magnetically driven power pre-dated the creators consciousness. So on its own will of unconcise but systematic need to move, change and shift like the very sea of the cosmos, KI from the creators very source weaved a chain of creation and distraction ~~weaving~~ creating a quality to all cosmic forces.

39) The Creator, Creation and Science: Gave life to a unconcise but willing universe. But the magnificence of the creator didn't end there!

40) Servants and Celestials of order and Chaos: To give a supreme purpose to the universe the Creator brought about two intelligent forces • forged from the very source of order, and the very source of chaos. The celestials of order were created from forces we must translate for simplicity as Life, Light, and Virtues (earth, air and water)

41) and the Source of Chaos as Death, Calamity and evil, (water, fire, air and earth). These two Celestial bodies worked as Counter forces to unknowingly govern the very universe and its never ending cycle.

42) Servants of the ^{Cosmic} ~~celestial~~ bodies: The humanoid a concise celestial been weaved into the fabric of the universe, so to come ~~into~~ being on any Cosmic body that is in total elemental, ~~cosmic~~ environmental order to sustain its living body.

43) Like there Superior celestial Km the humanoid was created by the Creator as a governing factor in the lesser plans of the universe. The difference between the Supreme celestials and the humanoid are ~~two~~ two factors

44) One; The humanoid is formed from the natural organic elements of its Cosmic body, Two; The humanoid can draw from the Creative or destructive Sources of magnetic energy of the universe making them a Celestial been of balance.

45) Humanoids where ~~task~~ task to explore, understand, teach, and breed across space and time. Thus bring about Celestial Civilizations tasked by there ancestors before them to civilize other humanoid species and to teach them the Laws and Will of the Creator.

46) Due to the humanoids organic birth on the Solid Plan of existance they possesse conciseness of self but lack understanding of any basic knowledge till taught by a higher humanoid civilization.

47) The trinity of life and existance: Without The Creator, Creation and Science, and its individual duality the universe itself would have never come into existance. We as a race must spread this history of Supreme conciseness to wake up the fellow Seekers of truth. To Be continued, Bookone, The trinity of Genesis...

B. Foundation, Structure and ~~form~~ religious government of the Fellowship of Spiritual Science

48) The fellowship of Spiritual Science is the foundation of our religious government. Within this foundation is the Structure for the Clergy, Clerical System of religious duty, Authority, Jurisdiction and political views, within the fellowship of Spiritual Science.

49) Symbolically the Structural System of our governmental Clergy ~~Structure~~ is known as the Silver Pyramid. The origins of this name stems from the historical understanding that the pyramids represent civilization, Law, order and Spirituality.

50) There are three prime-parts of the Silver pyramid;

•  The top of the pyramid represents the umbrella of the fellowship of Spiritual Science, its members, teachings, doctrine and its spiritual governmental structure.

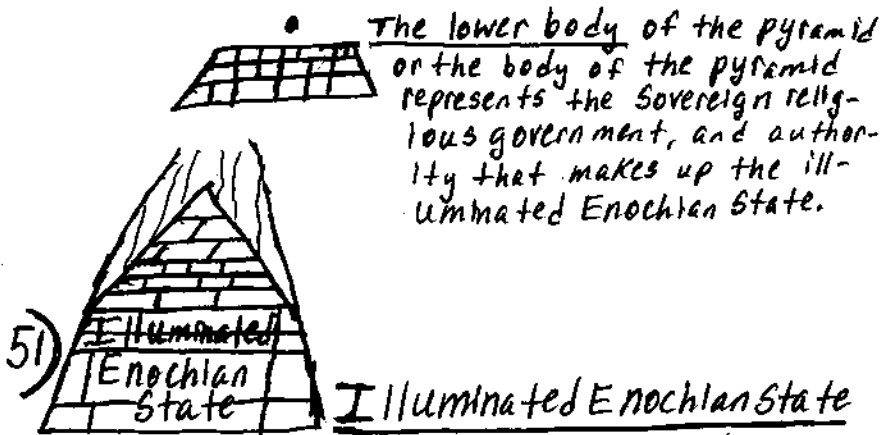

•  The center of the pyramid represents the heart of the pyramid. The heart is 3 folds (levels) of our Community's fellowship, and the depths of our doctrine, ethics, and politics. These levels are as such;

① • folds of the fellowship not within the fold/unorthodox Spiritual Science

② • First fold/orthodox Spiritual Scientist not of the Clergy or within the Clergy.

③ • Second fold/orthodox Spiritual Scientist within the Clergy

④ • Third fold/orthodox Spiritual Scientist within the Clergy.

The Enochian State is the Clerical, Clergy of Spiritual leadership and Offices that govern the fellowship of Spiritual Science.

58) Seekers of truth; This is only the beginning of a wonderful fellowship of the righteous. Everything we do is based on our divine principles of the Scale

1. Sacrifice

2. Justice

3. respect

4. loyalty

5. Honor

6. equality

7. and unity.

59) These prime-principles are carried along into every aspect of Spiritual Science. Supporters, Partly enrolled, or enrolled any person that follows our teachings, believes in the trinity of life and lives the life of a zedek must uphold these prime-principles and insure that other zedeks do the same.

60) The doctrine and ethics of a Seeker is not a game, when you turn this page and begin your Journey down the path of truth and Salvation. What you will learn shall burden you with knowledge, wisdom and understanding that's undeniable even to the modern Scientist or educator alike.

61) Welcome to The Fellowship of Spiritual Science where you shall seek and find your answers to self elevation, liberation and Salvation and so much more!!

Doctrine and ethics of a Seeker

1) The noble halo is the doctrine of Spiritual Science itself.

The union of Spiritual Science (1) 1st ring
~~Basic~~ Spiritual Science (2) 2nd ring
 Advance Spiritual Science (3) 3rd ring
 Divine Spiritual Science (4) 4th ring

As you read on you shall be given a basic Summary of each ring within the doctrine of Spiritual Science. To give you the best understanding available to continue on your Journey of truth!..

2) First; The union of Spiritual Science, There are 8 teachings you must know and master to move on to the Second ring of the noble halo(s).

- unity of Spirituality and Science.
- The holy trinity of life and its duality.
- The eye of ~~the~~ ~~the~~ Odysseus.
- Divine principles of the Scale.
- The modane Laws of the Scale.

3) The first lecture (which means lessons, or teaching in the Spiritual Science Society) is the unity of Spirituality and Science. For several Centuries two prime Communitys have been at war over authenticity of two controversial Subjects! Spirituality and Science.

4) Till now there has been ~~no~~ ^{no} end to the constant battle that has even lead to the death of people, Cultures and even Society's..... Prince Enoch saw this dilemma and knew something needed to be done.

5) So After a decade of research and study Prince Enoch found that Spirituality is one half of a whole too Science.

That without the System of complex mathematics existence itself would be moot, and without Spirituality nothing would

(Two)

Prince Augustus A. Enoch

Doctrine and ethics of a Seeker

exist! So Prince Enoch put both Spirituality, and Science under one great union to finally put an end to a fruitless battle of words, and will.

- 6) To further expand this lecture I will define more on how the union of Spirituality and Science took place and held. Through history there has been mass interpretation of knowledge, events, cultures, species and even time.
- 7) This accrued when religious scholars ignored the modern force of science for biblical text that lack much historical soundness. And when philosophers and scientists ignored the unexplained and focused on solely what they could see and prove to extreme degree...
- 8) This battle of scholarship between the two forces killed millions of people, disrupted peace, caused mass genocide, and slavery. The worse part is this separation between the two forces set humanity back and stagnated our evolutionary growth as a whole.
- 9) Thus the reason the union of Spirituality, and Science has taken place. To put an end to a pointless conflict of words that have not benefited either party nor the salvation of humanity.
- 10) The second lecture is The trinity of life and its duality. After the fusion of Spirituality and Science another prime-fact is set in motion; The holy trinity of life. Creator, Creation and Science (see Trinity of Genesis). With the Creator all things are, without the Creator there would be know Creation, and without Creation there would be know Science, and without Science there would be know understanding of the Cosmic truth.
- 11) The only thing that remains without the others is the Alpha of existence, the Creator, Explain in the trinity of Genesis, the Creator always was then he/she became

Three

Prince Augustus A. Enoch

Concise too ones own existance Cause the beginning of our very universe. The Duality to the trinity of life is Creator and Dstroyer

Creation then Distruction

Science or Oblivian

The Duality exist because without one there wouldn't be the other. Without ~~the~~ The dstroyer the Creator would have never been able to will his new, fused self into existance. Without distruction there would be nothing to Create.

And without oblivian there would be no absent space for the matrix of mathem-atics to weave its cosmic web.

12) This is the true duality of our very existance. There are Scientist that believe life is a cosmic ~~accident~~ accident from the chaotic universe. Its a mistake to believe such a fools fall because nothing in the universe changes absent another shifting force of existance. Thus it would be mad to assume the following;

- Air just was and we breath it. We both know that air only exist due to ~~the~~ Duality of two elemental Property's nitrogen and oxygen that is forced into a eternal cycle of motion due to Atmospheric Shield around earth.

- Fire inflames itself into existance and just burns. Again fire is a fusion of two elemental property's that force it to Spark into existance and is constantly ~~fuelled~~ fuelled by feeding on the oxygen.

Nothing in the universe does anything absent another, thus the reason the big bag theory from a fundamental Scientist perspective is faulse and unreltable to establish the truth ~~of~~ of our Creators existance.

Doctrine and ethics of a Seeker

13) The ~~second~~ ^{Third} lecture is The eye of Odysseus. This is a ~~cardinal~~ cardinal lecture in the First ring teaching(s). It defines, investigates, understands and establishes if a lecture of any kind, view, theory or study is "truth."

We use the name Odysseus ~~due to~~ due to its Greek translation for thinking, thinker, quick witted etc. But for Spiritual Science it means the eye of the mind (Third eye).

14) There are ~~four~~ four ~~points~~ points one must fill to determine if the information is unfound, fact or theory.

1) History: . . . prongs.

2) Philosophy: prongs.

3) Science: . . prongs.

4) Spirituality: prongs.

15) Each point have there own set of ~~prongs~~ prongs necessary to ~~meet~~ establish a independent or Collective truth. If a individual point meets all its prongs individually it shall determine one of two things; Theory or fact.

16) Four points of the Odysseus

• History: has three prongs, If all three prongs are meet individually It shall be known as a historical fact.

• First prong: Geological findings or location.

• Second prong: Historical reference of Subject in Supported/factual historical text.

••• Historical Correlation with Similar history or location.

• Philosophy: Has four prongs, If all ~~four~~ four prongs are meet individually it shall be known as philosophically sound.

• Philosophy Supported in practice.

•• Philosophy that Correlates with Science.

••• Philosophy that Correlates with a philosophical fact.

•••• Philosophy that is fundamentally sound in logic.

(Five)

Prince Augustus A. Enoch

Doctrine and ethics of a Seeker

☞ Science: Has two prongs, If ~~one~~ ^{both} prongs are meet individually it shall be known as a Scientific fact.

- Mathematically sound theoretically.
- Mathematical fact.

☞ Spiritually: Has seven prongs, If all seven prongs are meet Collectively in a individual point. It shall be known as a Spiritual theory

- Spiritual theory Correlated with historical events.
- Spiritual theory Correlated with Scientific facts.
- Spiritual theory Correlated with theoretic points.
- Spiritual theory Supported by Philosophical facts.
- Spiritual theory Supported, or Correlates with logic and reason.
- Biblical Correlation with other supportive biblical text or history.
- A Spiritual Correlation with 3 out of 7 prongs that can support one another in theory or in facts.

Fact finder

In total there are 16 prongs between the four points. When each point lacks there individual prongs to uncover the weight of the idea, or subject, you can utilize the prongs of each point Collectively to determine a truth. For this to work there must be;

- 2 or more historical prongs
- 2 or more philosophical prongs
- 1 or more Scientific prongs
- 3 or more Spiritual prongs.

(Six)

Doctrine and ethics of a Seeker

17) Also there are other factors in fact finding if there are Scientific prongs such as a mathematical fact no other prong is necessary to determine the truth/fact of the such subject.

Individually a points value on the scale is;

- Historical point value shall equal 2 Scale Points when you complete fulfilling the ~~two~~^{three} Prongs.
- Philosophical point value shall equal 2 Scale Points when you complete fulfilling the four Prongs.
- Scientific point value shall equal 16 on the scale if you fulfill a mathematical fact and theory. But a Scientific point value alone is worth 7 on the scale without point value support of other individual points.
- Spiritual point value shall equal 4 scale points when you complete fulfilling the seven prongs.

Collective point value reduction and increase

1) Collective of twos

- History and philosophy increase as a collective by 2 points
or, Science increase as a collective by 3 point
or, Spirituality increase as a collective by 1 point
- Philosophy and History increase as a collective by 2 points
or Science increase as a collective by 4
or Spirituality decrease as a collective by 3
- Science and History increase as a collective by 3 points
or Philosophy increase as a collective by 4
or Spirituality decrease as a collective by 1

2) Collective of threes

- History, Philosophy and Science loss no value
or Spirituality increase as a collective
• by 3

Anything found after this lecture are only reflections of our Core-principles, and not in any form deemed greater nor lesser. They are just reflective in nature.

The Divine principles of the Scale are the pillars that The Fellowship of Spiritual Science stands on. These pillars are not only further defined by the Sub-principles but also by the modern Laws of the Scale.

20) fifth lecture; The modane Laws of the Scale, Also
Known as the enochian State Law:

These Laws were designed to create the Supreme Scale of do's and don't's within the fellowship of Spiritual-Science. Translated from the original Commandments of the Creator, passed down through his Supreme messengers to Enoch the first and only prophet.

21) Now Prince Augustus Enoch further translates these Laws that came in the form of Vows from the prophet Enoch too present new, and informative Laws that are clear for all the people to know and understand...

Modane Laws of the Scale
